

Kamyar

Product Designer

Tehran, Iran | kamyarrasolzade@gmail.com | kamyar.site | linkedin.com/in/kamyar-rasoolzade

Summary

Product designer with 6+ years of experience designing ERP systems, financial platforms, LMS products and data-heavy dashboards for web and mobile. Works directly with stakeholders and business owners to turn business needs into clear product structures, design systems and high-fidelity interfaces. Background in front-end development; designs and builds products end to end with React, Next.js and Node.js, so what ships matches what was designed.

Experience

Senior Product Designer, Dots a Technology Ltd

Coquitlam, BC, Canada | Jan 2026 – Oct 2026

- Led the end-to-end design of Rostly, an LMS and management platform for sports schools, bringing classes, students, finances and payments into one product.
- Conducted business and user research to uncover operational needs and turn complex requirements into clear product structures and workflows.
- Built a design system from scratch, with design tokens, reusable components and interaction patterns used across every module.
- Designed the full web platform, from information architecture and interactive prototypes to responsive high-fidelity screens ready for developer handoff.

Senior Product Designer, Abinno

Tehran, Iran | Jun 2024 – Jan 2026

- Designed and delivered software dashboards with a focus on usability, information hierarchy and efficient workflows.
- Designed responsive web and mobile interfaces built on accessibility, consistency and reusable components.
- Brought inputs from multiple stakeholders together into clear, user-centered solutions, resolving cross-team research and alignment issues.
- Worked with engineering and product teams to ship production-ready features that met user needs and business goals.

Product Designer, Farasia

Qazvin, Iran | Aug 2020 – Jun 2024

- Designed ERP systems, retail platforms and financial modules for web and mobile, with a focus on clarity and complex data workflows.
- Led and managed the design team, keeping design quality and consistency aligned with product and business goals.
- Improved the usability of complex financial and ERP modules through interaction design, workflow optimization and process simplification.
- Built web versions of the applications with modern front-end architecture for performance and maintainability.

Front-End Developer, Visapick

Qazvin, Iran | Mar 2020 – Aug 2020

- Developed user interfaces for management dashboards with modern front-end technologies.
- Built reusable components that sped up development and kept the interface consistent.
- Worked closely with the design team to implement UI and UX precisely.

Selected Projects

- **Rostly:** LMS, administration and finance platform for sports schools, with a design system built from scratch. rostly.com
- **sheidaee:** Life coaching website, designed and built end to end in Next.js.
- **Farasia:** Website for a robotics and software engineering firm, with interactive 3D product views. Designed and built in Next.js. farasiaco.ir
- **Apollo X:** Crypto lottery and NFT platform: research, user flows and high-fidelity web design. [Figma prototype](#)
- **Anetx Pad:** Multi-chain crypto launchpad for fundraising, staking and token creation. [Figma prototype](#)
- **Solid Builder:** Cloud hosting dashboard: server health, controls and every project in one screen. [Figma prototype](#)
- **More work:** Elegant Website Kit ([Figma prototype](#)), Sanat Tariq (sanattariq.com), Lily Pool Co (lilypoolco.com)

Skills

Product design: UX strategy, information architecture, user flows, interaction design for data-heavy interfaces, wireframing, prototyping, high-fidelity UI, design systems, responsive web and mobile design, accessibility (WCAG)

Research and product: User research, usability testing, business analysis, stakeholder interviews, requirements gathering, product management, cross-functional collaboration, design handoff, design QA, design team leadership

AI: AI workflow design and automation, prompt design, AI agent skills, AI-assisted research and prototyping

Tools: Figma, Adobe Illustrator, Adobe Photoshop, Adobe Premiere, Notion, Postman, GitHub, GitLab, Claude, ChatGPT

Development: HTML, CSS, JavaScript, TypeScript, React, Next.js, Node.js, databases, Git, Docker

Languages

English (IELTS 7.5, C1), Farsi (native)
